Oranka Juice Solutions

Welcome to Oranka Fruit Juices, the specialist for the healthcare sector. For decades, we have been a trusted name in the Netherlands. From our modern facility in Oldenzaal, we offer an extensive range of over 100 different beverages. Think of fresh and organic juices, smoothies, high-quality fruit juice concentrates, tea, iced coffee, and protein-rich products specifically tailored to the needs of healthcare institutions such as nursing homes and hospitals.

At Oranka, we believe in accessible quality for everyone. Whether it's a healthcare facility, a nursing home, or a hospital, we provide solutions with the perfect balance between convenience, hygiene, appearance, price, and quality. Our premium look, customer-oriented service, and extensive product range make us the ideal partner in the beverage industry.

Our ISO 22000 certification ensures food safety and quality. This standard can be integrated with the ISO 9001 standard for quality management systems, providing additional assurance. With our in-house technicians and logistics partners, we guarantee reliable delivery and excellent service. At Oranka, the satisfaction of residents and guests comes first.

Every healthcare facility is unique. That's why we provide customized solutions that align with your specific needs. Discover how we can contribute to the well-being of residents and visitors with our delicious beverages!

UBR's Oranka (Unique Buying Reasons)

Determine which features and benefits of Oranka matter most to you:

Delivery and Reliability

- Delivery is free, depending on the order amount and country.
- Always available from stock.
- More than 98% of deliveries are made as agreed.
This means: "Orders placed before 3:00 PM are delivered the next business day."
- If something unexpectedly goes wrong or you need something urgently, we own multiple delivery vans, allowing us to act quickly.

Equipment Reliability

While malfunctions are always resolved, as an organization, you want as few interruptions as possible—especially when guests are present. Oranka has a track record with a minimal failure rate.

Excellent Service

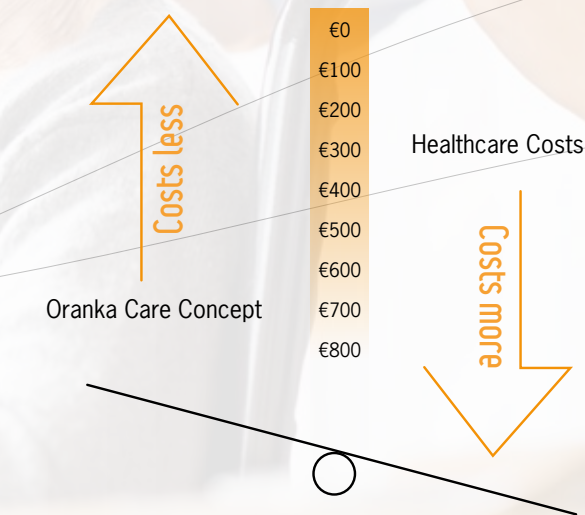

- Free installation and training.
- The first deliveries are personally handled by Oranka, ensuring a proper and safe placement of all equipment/loaned dispensers.
- Malfunctions are guaranteed to be resolved within 48 hours.
- 95% of reported issues or questions can be solved over the phone.

Reducing Healthcare Costs

Very few elderly people enjoy drinking plain water. The introduction of Oranka juices increases hydration levels, leading to healthier, more active residents. Additionally, Oranka juices are suitable for diabetic patients.

Various Presentation Options

- Free loan dispensers
- A diverse range of dispensers
 - Machines for premix
 - Machines for concentrate
- Glass jars in various styles with specially designed, anti-drip taps made for Oranka!
- Juice Cube Concept
- Hydration Bar (available in small and large)
- Grab & Go
- Crushed Ice Terrine
- Carafes

Naturally...

at Oranka, we focus on sustainability. Every day, we strive to achieve a healthy balance between people, animals, and the environment. Curious how we do it? Here are a few examples:

● **Products:**

Our assortment includes a wide range of products, many of which are often a more sustainable option. For instance, using concentrates not only saves storage space in transport vehicles and packaging materials but also reduces the energy needed to cool unopened packages. Want to learn about the sustainable features of each product? Browse through this brochure and look for the recycle stamp “♻️” for more information. Need extra clarification or more details? Contact us via our website: oranka.nl!

● **Packaging:**

Thanks to our concentrates, you save significantly on packaging materials. Producing 120 ready-to-drink cartons of juice generates 6.1 kg of waste, while Oranka products generate only 0.4 kg. Additionally, we aim to ensure that all our packaging is recyclable whenever possible.

● **Transport:**

Not only is the content of our products often the more sustainable choice, but the storage space required for transporting our products is much smaller compared to freshly squeezed juices. For example, the production and distribution of 120 cartons of juice equates to the CO2 emissions of a car driving 42 kilometers. Choosing Oranka juices reduces this to just 2.1 kilometers.

Green key

Green Key is the leading international certification for sustainable businesses in the recreation, leisure, and corporate sectors. Companies with a Green Key certification do everything they can to protect the environment without compromising the comfort and quality experienced by their guests. They go above and beyond the standard legal requirements.

We are proud that several of our products have been included in the Green Key showcase. This initiative is led by Stichting Keurmerk Milieu, Veiligheid en Kwaliteit (KMKV), the Dutch organization for environmental, safety, and quality certification. Curious to know which of our products are featured in the showcase? We'd be happy to show you:

APPROVED PRODUCT

Oranka Care Concept

Imagine a world where health and convenience go hand in hand. Where caring for yourself and others flows together effortlessly. This is what Oranka stands for. With our healthy, nutritious juices and easy-to-use systems, we make life a little better.

Attractive Beverages

Few seniors enjoy drinking plain water. Through our experience, we have found that introducing a variety of Oranka Juices and Smoothies increases fluid, vitamin, and calorie intake. Even the most reluctant drinkers are encouraged to drink more

Irresistible Flavors

Oranka juices are available in over 20 different flavors, ensuring that there is a taste for every resident. The visibility of the juices in our dispensers or carafes, along with their appealing colors, will motivate residents to drink more. Oranka juices are enhanced with Vitamin C and Zinc and are suitable for diabetic patients.

Serving Options

The use of dispensers makes juices more accessible and promotes fluid intake. Dispensers can be placed in dining areas, activity rooms, and living spaces. Oranka carafes can also be used for small-scale living, allowing multiple flavors to be presented at breakfast or lunch simultaneously.

**As fluid intake rises,
the costs of care decrease.**

At Oranka, we believe that health does not have to be complicated. We make a difference with our simple, yet effective solutions. Together we strive for a world where health is accessible to all.

And that's not all. Our Care Concept ensures that all necessary conditions are met for proper fluid and vitamin management. Our juices have good nutritional values, take up little storage space and provide reduced operational time and cost savings.

But Oranka offers more than just flavorful drinks. Our unique Care Concept is specially designed to increase residents' fluid and vitamin levels, resulting in a noticeable increase in activity and an overall sense of well-being.

Good hydration leads to happier and healthier residents

The Flavors are enhanced with added aromas, making it easy to distinguish which fruit it is.

Beverages are always within reach because the dispensers are distributed throughout the building, for example, one is placed in the central living room.

The attractive displays on the dispenser let me see at a glance which flavor is inside.

Plenty of choices - more than 20 flavors, including my favorite: rhubarb.

The dispensers are easy to use, even for me with my painful wrists and hands.

It's amazing that the juice is always perfectly chilled.

By drinking smoothies, I also increase my calorie intake.

It's very good for me - 2 glasses provide 100% of the daily Vitamin C requirement.

Zinc has also been added, which helps me absorb Vitamin C, strengthening my immune system.

Oranka Hydration concept

Oranka is committed to offering healthy, nutritious juices with user-friendly systems. Our hydration concept helps increase fluid and vitamin intake, leading to better well-being and a noticeable increase in activity among residents.

This unique hydration concept allows us to meet all essential requirements for an effective fluid and vitamin policy. We provide excellent nutritional values, require minimal storage space, reduce operational time, and result in cost efficiency.

Oranka 1+19 is a leading 20% high-quality fruit drink with only 2% sugar. It contains natural aromas and is free from preservatives and colorants.

Naturellement...

Naturellement... le carton de ces emballages provient de forêts certifiées par le Forest Stewardship Council™ (FSC™), garantissant une gestion forestière responsable.

Additionally, Oranka 1+19 stands out for::

- A high vitamin C content (50% of the recommended daily allowance per 200 ml).
- Certain flavors contain added zinc to improve vitamin C absorption and support the immune system.
- It is packaged in ½ liter concentrate, which makes 10 liters of final product, saving storage space and reducing waste.

Oranka offers tempting flavors with more than 20 different options, ensuring every resident has a favorite. The visibility of our juices in dispensers or carafes, along with their vibrant colors, encourages residents to drink more. Additionally, Oranka juices are enriched with vitamin C and zinc, making them suitable for diabetes patients.

Smoothies

Tasty addition to fresh fruit!

Our Oranka smoothies are made from 100% fruit and/or vegetables, and we offer a wide range of 8 different flavors, including an organic option. Additionally, our smoothies are relatively high in calories, which benefits calorie intake. This makes them an excellent and complementary alternative to offering fruit to elderly residents in a ward.

The numerous benefits of smoothies:

- Time-saving due to less need for fruit cleaning.
- Hygienic serving of smoothies compared to distributing fruit.
- Reduced waste and less need to purchase various fruit types.
- Easily consumable for residents with swallowing difficulties (drinkable).
- Consistent taste and a wider variety of flavors for residents.
- Enjoyable at any time of the day.
- Small selection also available in 0.2L mono packaging.

Tempting
and attractive
offering

Small-scale living

Small-scale living requires flexible and practical solutions. At Oranka, we understand this. That's why we have developed special solutions that fit even the smallest living rooms.

No room for a dispenser? No problem! Our Oranka products can all be used in combination with our decanter concept. This allows you to create 2.5 liters of finished product in a very user-friendly way and serve your guests with a delicious glass of fruit juice, fruit nectar or fruit drink.

But that's not all. Our concentrates are not only flexible and practical, but also good for the environment. By using concentrates, no expensive transportation of water takes place and you contribute to less CO2 emissions.

Our concept is fully compatible with Oranka 1+4, 1+9 and 1+19 concentrates and is a smart solution for small-scale living. With Oranka you get not only healthy and nutritious juices but also a sustainable and practical solution for your institution. Experience for yourself how our carafe concept can help you provide healthy drinks to your residents.

Hydration Sticks

Oranka has developed a unique concept specifically tailored to the needs of small-scale living, such as in care institutions and residential groups. The successful hydration concept has been simplified and optimized, allowing departments to ensure proper hydration easily and efficiently.

With Oranka Hydration Sticks, you can prepare exactly 1 liter of product with a single stick. This provides the flexibility to regularly vary flavors without waste. The process is simple: place the stick in an Oranka 1-liter carafe, fill it with water, and it's ready to serve.

This innovative concept offers ease of use while also being space-saving, as it requires less storage space and eliminates the need for large packaging. Additionally, it is a sustainable solution, producing significantly less waste than standard liter packaging. The sticks contain only 2% sugar, no added sugars, and are completely allergen-free. They are also enriched with essential nutrients—one glass of Oranka Vital (200 ml) provides 50% of the daily recommended amount of Vitamin C and 30% of the recommended intake of Zinc and Vitamin D.

The stylish Oranka carafe fits perfectly in a homely setting, contributing to a pleasant and familiar environment for residents. This makes Hydration Sticks not only a practical but also an atmospheric choice.

With Oranka Hydration Sticks, you choose simplicity, sustainability, and optimal hydration—a solution that is good for both residents and the environment.

Naturellement...

nos sticks sont emballés dans une boîte en carton certifiée FSC et le risque de perte est encore plus réduit grâce à leur conditionnement individuel.

Frezz® E+

The tasty protein boost for a healthy body

Oranka introduces Frezz E+, a protein-enriched fruit drink specially developed for the healthcare sector. Proteins are essential for maintaining and growing muscle mass and play a crucial role in the body's recovery. For the elderly or individuals at risk of malnutrition, getting enough protein can be a challenge. Frezz E+ provides a simple and delicious solution.

Among the elderly, the loss of muscle mass and strength, known as sarcopenia, is common. This can significantly reduce mobility and independence. Adequate protein intake is therefore vital to prevent muscle breakdown and support muscle recovery. Frezz E+ is the ideal solution—with just one 150 ml glass, you get more than 10 grams of high-quality protein. Additionally, it contains all 9 essential amino acids that the body cannot produce on its own, making it crucial for maintaining and building muscle.

Frezz E+ is available in Orange (50% fruit content) and Cloudy Apple (70% fruit content) flavors. The drinks are lactose-free, specifically developed for use with an SNAQ score of 2-3 (indicative of a risk of malnutrition), and have a long shelf life outside refrigeration as long as the packaging remains unopened.

These protein-enriched fruit drinks combine health, taste, and convenience, offering a simple solution for improved protein intake. With Oranka Frezz E+, you help the elderly maintain their muscle strength and mobility while providing a delicious addition to their daily diet.

Naturellement...

les briques sont conditionnées dans un Tetra Brik, un emballage antibactérien qui garantit une durée de conservation optimale et une sécurité maximale. Le carton provient de forêts certifiées FSC™, assurant une gestion forestière responsable, et le bouchon est fabriqué à partir de canne à sucre biodégradable pour une durabilité accrue. De plus, les emballages Tetra Pak® sont recyclables après usage, et les matériaux peuvent être réutilisés pour fabriquer des palettes et des caisses.

ORANGE & CLOUDY APPLE PROTEIN+

LimOranka®

Refreshment with care

In the healthcare sector, where every detail matters and the well-being of residents comes first, using LimOranka provides a practical solution. This sugar-free syrup is specifically designed to meet the needs of elderly care facilities. With four flavors to choose from Orange, Raspberry, Tropical, and Reine Claude - LimOranka not only offers great taste but also several other benefits.

Its sugar-free formula supports residents' overall health, especially for those with specific dietary requirements. The variety of flavors helps stimulate appetite and contributes to a diverse diet. Additionally, Oranka offers convenient dispenser solutions, ranging from 1-liter carafes to dispensers capable of producing up to 580 liters of syrup-based drink without refilling. This reduces administrative tasks, allowing more focus on caregiving.

Naturellement...

le jerrycan est certifié PE-HD et, grâce à son rapport de dilution de 1 pour 28, un jerrycan de 5 litres de LimOranka permet de produire 145 litres de boisson, une solution délicieusement durable !

Naturellement...

les distributeurs Oranka **Smart ECO** sont fabriqués à partir de matériaux robustes et de haute qualité, sans utilisation de plastique. Cela leur confère une apparence élégante et durable, parfaitement adaptée aux concepts de restauration écoresponsables, tout en garantissant une longue durée de vie.

Oranka Smart M

Oranka Smart Sleek ECO

Oranka Tower Medium ECO

Oranka Smart dispensers

The Oranka Smart dispensers are specially designed for environments where efficiency, ease of use, and sustainability are essential, such as care facilities, hospitals, and residential care centers. They provide a practical and professional way to serve delicious beverages to guests and residents.

A standout feature is the ECO variants, which are completely plastic-free. These dispensers perfectly align with an eco-friendly approach, demonstrating that sustainability and quality can go hand in hand. With the ECO models, you serve drinks in a responsible and tasteful way.

The Smart dispensers are highly versatile. They offer multiple beverage options, fit into both small and large spaces, and are easy to operate via a touchscreen. Their adjustable height allows for filling both glasses and carafes. Additionally, various presentation furniture options are available, enabling the dispensers to function completely standalone. This adds extra flexibility, making them ideal for use in different departments or during events. Maintenance is simple, ensuring a hygienic environment - a crucial aspect in healthcare settings.
